

## Kids Essentials Immunity

### Proper Immune Function is Crucial in Children

Kids Essentials Immunity is a delicious, all-natural immune support formula for children, containing patented Wellmune® natural yeast beta-glucan derived from the cell wall of a highly purified, proprietary strain of baker's yeast (*Saccharomyces cerevisiae*).<sup>♦</sup>

A large body of clinical research suggests that Wellmune® can help support children's natural immune responses and provide protection from health challenges arising from physical and lifestyle stress.<sup>♦1</sup>

Proper immune function is crucial in children, especially as they grow and mature. Children also tend to be at risk of foreign challenges due to activities like school, playing outside, and being in daycare. Kids Essentials Immunity is a great way to help kids get the beta-glucan they need for healthy immune function in tasty chewable tablets. <sup>♦</sup>

### How Kids Essentials Immunity Works

Despite being Fungi, certain species of yeast have beneficial components for human health. In particular is baker's yeast (*Saccharomyces cerevisiae*), which has a unique polysaccharide called beta-glucan in its cell walls.

After ingestion, Wellmune® beta-glucan is taken up by immune cells in the gastrointestinal tract, transported to immune organs, and is slowly released for days after. In vivo and human clinical trials have shown that Wellmune® supports both innate and adaptive immune responses in children by promoting the production/activity of cytokines, white blood cells, T-cells, and other immune factors.<sup>♦2,3</sup>

According to clinical research, children supplementing with Wellmune® reported 66% fewer upper respiratory tract infection (URTI) symptoms and 6 fewer sick days over the course of 12 weeks than children taking a placebo.<sup>♦4</sup> Better yet, another study showed children drinking a milk formula with Wellmune® experienced fewer episodes of allergy symptoms than children drinking unfortified milk.<sup>♦5</sup>

### Kids Essentials Immunity Supplementation

Research cited herein suggests that Wellmune® supports children's natural immune response and may protect them from invasive health challenges.<sup>♦</sup>
