

SPM Supreme™

Synergistic Blend of 3 Pro-Resolving Mediators*

CYTOKINE SUPPORT

SPM Supreme™ is a synergistic combination of three specialized pro-resolving mediators (SPMs) to help support a normal inflammatory response.* SPMs are a class of newly discovered molecules that are produced in the body from the metabolism of omega-3 and omega-6 fatty acids, which are found in foods such as fatty fish, nuts, and seeds. They may help support the resolution of the initial steps in the body's inflammatory pathway, helping to promote immune balance and a healthy inflammatory response within the body.*

SPMs have been shown to act as chemical messengers in the inflammation pathway and may help support the

body's normal response to physical stressors, helping the body create a healthy environment for new tissue development.*

SPMs may also help support the body's normal healing process.* SPMs help preserve the first phase of the inflammatory pathway, which may aid in the process of "resolution" of the inflammatory pathway.* SPM Supreme™ was formulated to help support the body's natural ability and capacity to respond to physiological stress and help "resolve" the immune process, encouraging immune system balance.*

Benefits

- Supports a normal response to physiological stress
- Promotes tissue repair
- Supports a normal inflammatory response
- Helps support the body's normal healing process

Recommended Use

Take 1 softgel per day or as directed by your health-care practitioner.

Highlights

- Synergistic combination of three specialized pro-resolving mediators
- Features a clinically relevant amount of SPMs standardized to 150 mcg, the highest concentration currently available
- Gluten-free, dairy-free, and soy-free
- Non-GMO
