

Tegrice[®] Colostrum

1 g Colostrum with 40% IgG

IMMUNE HEALTH*

Tegrice[®] Colostrum provides a combination of immune-supportive nutrients, growth factors, amino acids, and other important nutrients to support optimal immune function and gastrointestinal tract health.* Colostrum is the milk secreted from mammary glands in the first few days after birth, and it contains immunoglobulins, immune-supportive compounds in higher concentrations, and nutrients to support the growth and immunological function of highly sensitive newborns. Tegrice[®] Colostrum is standardized to contain a minimum of 40% immunoglobulin G (IgG), which plays a role in both passive immunity and modulation of the adaptive immune system. The composition of colostrum differs from milk produced later in lactation, and almost all essential nutrients are present in higher concentrations in colostrum than in mature milk.

Many biological activities of colostrum are shared across species and provide targeted support for the immune system and gastrointestinal tract in humans.* Unlike other brands, Tegrice[®] Colostrum comes from nutritionally supplemented cattle from USDA Grade A dairy farms in the U.S. These cattle are carefully fed a scientifically designed diet that contains the proper balance of legumes and grasses, along with trace minerals to ensure consistent, high-potency colostrum. Tegrice[®] Colostrum contains non-GMO ingredients and is free from gluten and soy.

Benefits*

- Supports a healthy immune system
- Supports digestive tract health
- Supports a healthy inflammatory response

Recommended Use

Take 2 capsules per day or as directed by your health-care practitioner.

Tegrice[®] is a registered trademark of Sterling Technology, Inc.

Highlights

- Contains a combination of growth factors, immune-supportive nutrients, and amino acids*
- Sourced from healthy, nutritionally supplemented cattle on USDA- and FDA-certified U.S. dairy farms
- Contains non-GMO ingredients
- Gluten-free and soy-free
