

# Ultra Quad Mag Pro

## Ultra Quad Mag Pro Supplementation

Magnesium is essential for over 300 enzymatic reactions, playing a vital role in cardiovascular function, energy metabolism, muscle relaxation, and neurological health.<sup>♦1</sup> However, diet, stress, and increased demands in daily life contribute to widespread magnesium insufficiency, impacting overall well-being.<sup>♦</sup>

Ultra Quad Mag Pro delivers a clinically formulated blend of four highly bioavailable magnesium compounds—magnesium glycinate, magnesium taurate, magnesium malate, and magnesium orotate—each selected for superior absorption and targeted health benefits.<sup>♦2,3</sup> By utilizing multiple forms of magnesium, Ultra Quad Mag Pro ensures optimal cellular uptake to support total-body wellness.<sup>♦</sup>

Key potential health benefits of Ultra Quad Mag Pro supplementation:

- Supports relaxation, healthy muscle function, and nervous system health<sup>♦</sup>
- Promotes heart health and healthy cellular energy production<sup>♦</sup>
- Supports mitochondrial function and reduces muscle fatigue<sup>♦</sup>
- Optimizes cellular magnesium uptake for enhanced metabolic support<sup>♦</sup>

## How Ultra Quad Mag Pro Works

Each form of magnesium found in Ultra Quad Mag Pro plays a distinct role in cellular metabolism, ensuring targeted benefits throughout the body.<sup>♦</sup> These include:

**Magnesium Glycinate** – A highly absorbable chelated form that promotes healthy muscle function, nervous system balance, and metabolic function while being gentle on digestion.<sup>♦4-6</sup> Glycine, an inhibitory neurotransmitter, also supports healthy sleep quality and neuronal health.<sup>♦7,8</sup>

**Magnesium Taurate** – Supports heart health by supporting calcium homeostasis, healthy cardiovascular function, and nitric oxide production for healthy vasodilation.<sup>♦9-11</sup> Magnesium taurate also aids in mitochondrial efficiency and cellular energy production.<sup>♦12,13</sup>

**Magnesium Malate** – A crucial component of the TCA cycle, fueling mitochondrial ATP production to promote athletic endurance, reduce fatigue, and support muscle recovery.<sup>♦14-16</sup> This form also plays a role in detoxification, helping to remove heavy metals like aluminum from the body.<sup>♦17,18</sup>

**Magnesium Orotate** – Facilitates intracellular magnesium transport, supporting efficient cellular uptake for healthy cardiovascular function, cellular repair, and metabolic function.<sup>♦19-21</sup> Magnesium orotate also supports DNA and RNA synthesis, contributing to healthy cellular function.<sup>♦22</sup>

With 108 mg of elemental magnesium, Ultra Quad Mag Pro promotes superior absorption and efficacy, delivering comprehensive support for cardiovascular health, energy metabolism, muscle function, and neurological well-being.<sup>♦</sup>

# Supplement Facts

Serving Size: 2 Capsules  
Servings Per Container: 30

	Amount Per Serving	%DV*
Magnesium (as magnesium orotate)	31 mg	7%
Magnesium (as magnesium lysinate glycinate chelate)	30 mg	7%
Magnesium (as di-magnesium malate)	25 mg	6%
Magnesium (as magnesium taurate)	22 mg	5%

**Other Ingredients:** Hypromellose, organic Nu-MAG®, organic Nu-FLOW®.

**Directions:** Take two capsules daily or as directed by your healthcare practitioner.

**Caution:** If pregnant, nursing, or taking medication, consult your healthcare practitioner before use. Keep out of reach of children.

PRODUCED IN A  
cGMP FACILITY

NON-GMO

GLUTEN-FREE
